

Adaptiva Client Health

Overview

Easily and quickly perform scheduled or instant health checks on one or a collection of PCs with Adaptiva Client Health™. Client Health helps you maximize the success of your computer management services while reducing your total cost of ownership.

- Centralize visibility and control with 100% accountability for distribution and updates.
- Reduce the cost of managing Windows, apps and PCs.
- Extensible with custom scripts and detailed reporting.
- Enterprise version available.

Features & Benefits

- **Fast, Tests End-to-End Functionality.** Independent monitoring framework doesn't utilize ConfigMgr client side framework. Check actual functionality, add custom checks, export for re-use and to share.
- **Simplify IT Operations.** Centrally control scheduled or instant health checks on one or a collection of PCs. Quickly run 40 checks including system performance (disk space, CPU, memory), Operation System (WMI, BITS, WSUS), Security (firewall, anti-virus and Vista UAC), ConfigMgr/SMS Agent (installation, version, service status, site assignment, heartbeat discovery). Easily perform auto or manual remediation.
- **Enterprise Functionality.** Includes built-in Health Check Editor, Form Editor and Workflow Editor, allowing you to modify existing health checks or create completely new custom health checks. All the editors are drag and drop, allowing you to create health checks without writing a line of script code.
- **Detailed Reporting.** Adaptiva Client Health offers comprehensive reporting with just a click (per PC or collection, health check, remediation success).
